9"x36"	- 3
9"x18"	- 3
6"x40"	- 4
6"x36"	- 4
6"x24"	- 4
6"x18"	- 4
4"x24"	- 6

INSTALLATION STEPS

1. Spread adhesive with a 1/2" x 1/2" square notch trowel or larger.
2. Set first tile into adhesive.
3. Position clips on all outside edges.
4. Set adjoining tile.
5. Compress tile into adhesive until trowel notches are collapsed.
6. Insert wedges into clips and secure with pliers until proper tension is reached, not so tight that the clip breaks yet not so loose that the clip and wedge are easily wiggled.
7. After the adhesive sets, break the clip and wedge free by striking the clip with force parallel to the grout joint.
8. Sweep the surface and save wedges for the next installation.
